earnix

Earnix Labs Evolution

Gain early access to experimental analytics in a secure sandbox, develop innovative analytical techniques, and advance sophisticated models into real-world applications with the transparency and explainability needed to confidently defend them before business and compliance teams.

Built for

Pricing Analysts
Quickly evaluate strategy impacts

Actuaries
Accelerate assumption testing and validations

Data Scientists
Deploy, iterate, and share advanced models effortlessly

Underwriting Leaders
Explore new segmentation and risk models

Challenge

Financial institutions face increasing pressure to innovate, but adopting new analytical capabilities often requires lengthy development cycles, competing IT priorities, and significant implementation effort. Increasingly complex models and disconnected platforms slow innovation, raise costs, and create compliance risks, limiting faster, more confident pricing and underwriting decisions.

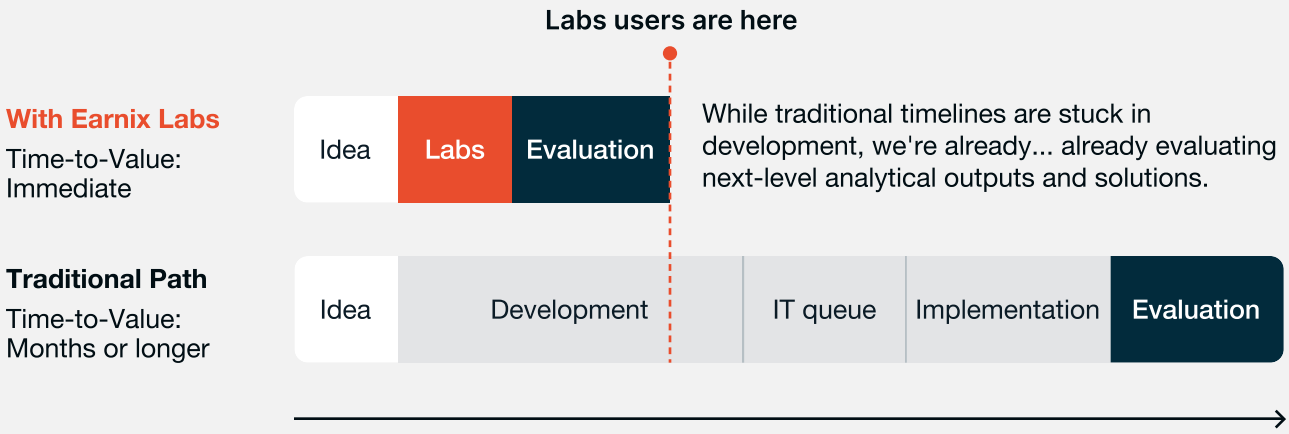

As a result, promising innovations can take months, or longer, to become available for evaluation and use.

Earnix Labs helps organizations challenge the speed of tradition processes by providing early access to emerging analytical capabilities directly within the Earnix platform, enabling faster evaluation, feedback, and adoption of innovation.

What is Earnix Labs?

All Earnix Cloud customers have access to the innovation engine of the Earnix platform. Earnix Labs' mission is to empower customers to confidently explore new analytics, independently deploy advanced pricing and underwriting models, and demonstrate their business and compliance value—while actively shaping innovations that improve efficiency, streamline operations, and solve real-world challenges.

Problem-solving at Earnix Speed

Expand on Innovation:

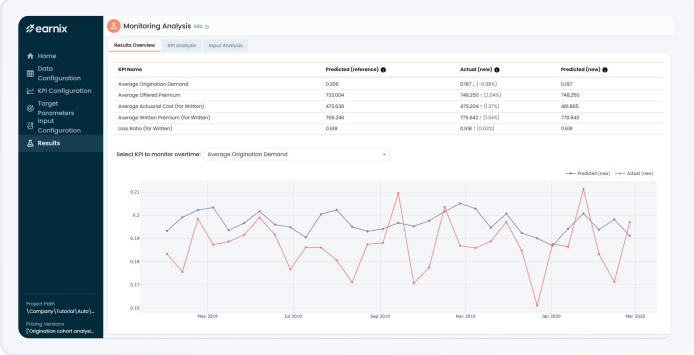

- Experimental machine learning and modeling approaches
- Advanced data prep and feature engineering innovations
- Model explainability, transparency, and comparison tools
- Pricing and segmentation experimentation environments
- Early-stage GenAI-driven analytical solutions

Expanding Analytics with Cutting-Edge Models. Lean into Earnix Labs' Continuous Learning Loop.

5 Key Value Drivers

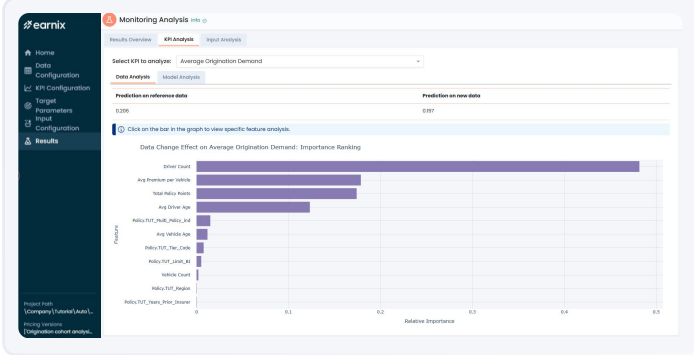

01	Accelerate Innovation	Test new analytical techniques without waiting for major releases
02	Faster Time-to-Value	Apply advanced analytics instantly within existing workflows
03	Safe Experimentation	Governed, low-risk environment for evaluating emerging technology
04	Democratized Analytics	Extend modeling power across pricing, actuarial, underwriting teams
05	Continuous Evolution	Labs improve with user input and graduate into core features

See It in Action

Monitoring Analysis: Results Overview

Track how model KPIs perform over time against a reference baseline, at a glance and in trend. Labs surfaces predicted vs. actual movement immediately, so teams catch drift early without waiting on a full model refresh cycle.

KPI Analysis: Importance Ranking

Analyze KPI changes through separate data drift and model drift perspectives, helping pricing analysts and actuaries pinpoint the true drivers of performance shifts, identify root causes faster, and take action without writing code or opening a support ticket.

How It Works

01 → Enable

Customer Success and Earnix support teams partner with you for Labs module activation.

02 → Access

Labs catalogs are browsed directly within the Earnix platform.

03 → Experiment

New capabilities allow for experimentation and review via guided workflows within existing processes.

04 → Evolve

Feedback loops enrich and shape capabilities and improve outputs.

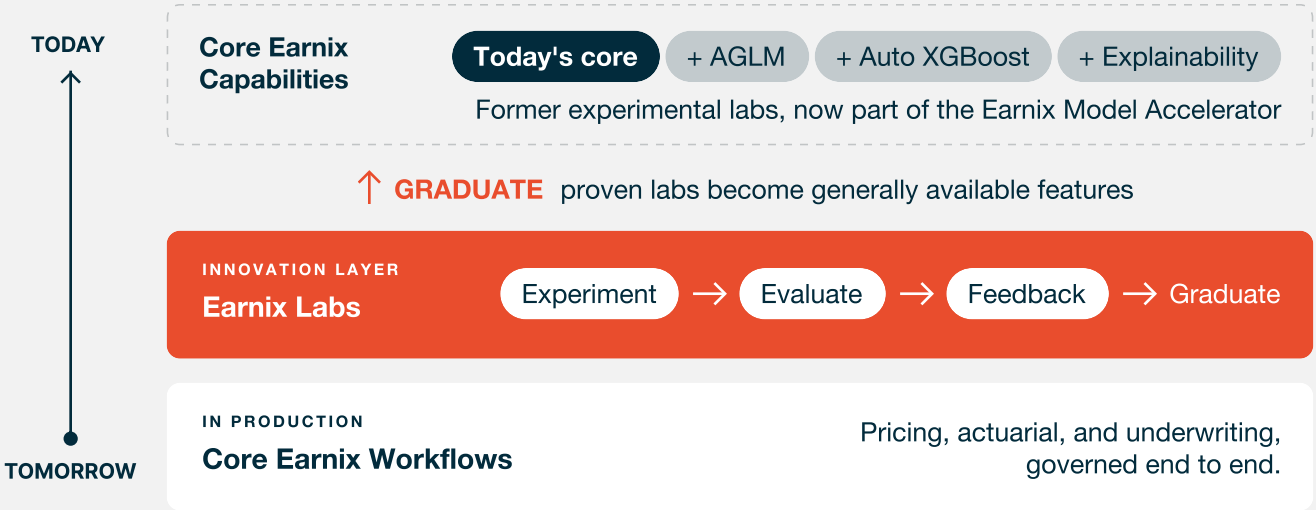

05 → Learn

Earnix Academy provides ongoing training for new users and labs released.

Extending Core Analytics with Continuous Innovation

Earnix Labs empowers customers to explore new analytical techniques, independently deploy advanced pricing and underwriting models with transparency, and actively surface ideas that shape innovation through participation, beta testing, and continuous improvement.

Earnix Labs: From Experimentation to Problem-Solving Technologies

Faster innovation with Earnix Lab's secure environments for analytics experimentation.

Available now for all Earnix Cloud customers. Explore the latest Labs directly in your Earnix platform or connect with the Earnix team to start innovating today. Bring models, ideas, or challenges. Together with your Earnix CX team, start building bespoke analytics solutions today.
