Pricing Accelerator

From Insight to Action, Faster

Pricing Decisions Are Moving Too Slowly

State and Product Managers are accountable for profitability, growth, and market response—but they lack direct access to the data that drives results. Critical pricing data is scattered across actuarial reports, spreadsheets, and disconnected systems. Simple questions require multiple handoffs. Simulations take weeks. Committees stall. Meanwhile, the market doesn't wait.

The result: delayed decisions, higher risk of errors, missed opportunities, and teams spending more time chasing insights than acting on them.

Introducing Pricing Accelerator for State Managers

Pricing Accelerator, a purpose-built module within Earnix Price-It, gives State and Product Managers fast, transparent, and business-ready access to pricing intelligence.

It transforms complex actuarial analytics into intuitive dashboards, simulations, and reports, so teams can explore scenarios, understand impacts, and move pricing strategies forward with confidence. All teams operate from a single source of truth using role-based interfaces designed for how they work.

In short: fewer dependencies, faster decisions, and better pricing outcomes.

Key Features

Interactive Dashboards

Visualize past and current pricing performance and see the impact of every strategic change.

Safe Workspace

Test scenarios in a controlled environment, protecting data integrity and governance.

Scenario Simulations

Run portfolio-level and factor-selection scenarios independently, exploring "what-if" questions without affecting underlying models.

KPI Tracking

Monitor loss ratio, combined ratio, premium growth, and more, with real-time explanations and visualizations.

Core Use Cases

Run Simulations Instantly

Explore portfolio and factor scenarios on the spot, reducing bottlenecks.

Analyze Performance Clearly

Access KPIs and underlying data for transparent, actionable insights.

Lead Committees with Confidence

Bring data-driven insights to every discussion, enhancing alignment and influence.

Monitor Actual vs. Expected Results

Compare forecasted and actual performance to catch issues early.

Streamline Rate Filings

Automatically generate accurate, traceable filing documentation that matches production rates.

Centralize Factor Selection

Ensure accuracy, consistency, and accountability across pricing decisions.

Key Benefits

Decide Faster	Run simulations, analyze KPIs, and answer “what if” questions in real time—without waiting on other teams.
Align Teams	Share data, logic, and visibility from analysis to deployment. No more version chaos.
Experiment Safely	Test scenarios without risking models, data, or production rates.
Collaborate Stronger	Actuaries, data scientists, IT, and managers work in parallel—without stepping on each other.
Govern with Confidence	Clear impact analysis, KPI deltas, and automated documentation ensure defensible decisions.

Where Insight Drives Action

Pricing Accelerator bridges actuarial rigor and business usability, putting pricing insight directly in the hands of decision-makers—without compromising governance, accuracy, or control. Faster decisions. Aligned teams. Confident pricing strategies. With Pricing Accelerator, business agility isn’t aspirational—it’s built in. Contact us today to see how Pricing Accelerator can transform your pricing operations.
